

[facs] Lab Clean Up Ideas

Teresa Connelly teresa.connelly@nsanpete.org

Fri May 9 13:52:24 MDT 2008

Thanks to everyone who sent in ideas... I complied them because several have asked for results.

Thank you!!!!

I only had four units and two classes to do the cleaning, so i made up a check out sheet for each unit and listed ALL the things that I needed done in each unit with a line out to the front of the job. A couple of days before we actually start cleaning, I have the students go over the list and have them put their name out to the side of the job that they would like to be responsible for. (so some jobs are done during one class and the others are done during the other class.) On the day of cleaning, they do the job they signed up for and when they're done, they initial it, they have me check it and I initial that it has been done to my expectations - if not, they redo it. If at the end of the last class, there are still items that need attending to, anyone can sign up for them for extra points - students are required to earn so many points during this "cleaning" time! They helped dirty the room, they get to help clean it! I also give those who help a popsicle party! (I just bought some at Smith's. They're the big Otter Pop type and I got them 36 for \$2.50 - I've sometimes found them at Wal*Mart for \$1.00)

I also have a list of things that can be done around the room (I have one room for all FACS classes) that are not related to the kitchens (clean sewing machines, mirrors, etc)> I'm sending my list (it gets changed every year) in hopes it helps! Explanation about some of the jobs: My class was right next to the shop class and our shop teacher did a lot of "summer" work for the district. I would come back with saw dust all over in my room. Because of this, I have the students take everything out of the units and store them in my back room (a hassle, but it sure helps in getting things ready the next year!) At the beginning of the year, I have the students wipe out the cupboards and organize the equipment back in them (this also helps them know where everything is / goes! Hope this helps!

I make each class do the same stuff. It may seem very redundant, however even with that they still don't get it super clean all the time. I do walk around and help point out stuff they need to do. Here is the cleaning sheet I use. I go around and sign them off on each item (or have a responsible student do it). I also provide them creamies if they do a good job (or another treat, but I like the creamies).

Kimber

I only have one high school class in my lab, but one year I wrote down all the jobs I could think of--I tried to make them equal as far

as the amount of work involved--then I had the kids draw a job out of a hat. You have to watch that they don't read the job, then trade. I also didn't have all my kids here so some jobs didn't get done.

Name: _____ Unit# _____ Per. _____
Name: _____ Name: _____
Name: _____ Name: _____

9Cleaning Day

- _____ Wash out the inside, and outside of the microwave until spotless.
- _____ Clean the turntable/plate in the microwave.
- _____ Wash all the counters, including underneath all equipments (move it). (last)
